

# ECOLOVIAL

EcoloVial is a vial in which the cap and vial are molded in a single piece. With a simple manipulation, it can be converted from a secure vial to an easy-to-open (VNS) version.

## TECHNICAL SHEET

Format and quantity per box	<p>12 dr : 400          19 dr : 260          34 dr : 150          56 dr : 92</p> <p>Pre-assembled vials and caps.</p>
Material	Polypropylene (type 5)
Colors available	<ul style="list-style-type: none"> <li>- Clear</li> <li>- Green</li> </ul>
UV protection	<p>Green vials: 97%* (the highest protection rate on the market)  <i>*On average, depending on vial size.</i></p>
Operational benefits	<ul style="list-style-type: none"> <li>- Multifunctional: easy to convert into a non-secure vial.</li> <li>- Vials and stoppers molded in one piece: major savings in time, space and laboratory efficiency.</li> <li>- Heat-sealed vial and stopper: eliminates contamination risks.</li> </ul>
Eco-friendly product	<ul style="list-style-type: none"> <li>- Contains 35% less plastic*.</li> <li>- Minimalist shipping packaging (no plastic bags / less waste)</li> <li>- Easily recyclable</li> <li>- Contains no toxic products (PVC, BPA or others)</li> </ul> <p><i>*In comparison with a similar product from a traditional manufacturing process.</i></p>
